AN meets HER: three lettermarks

Corporate, minimalist marks built from the letters themselves: AN for Access Network, and HER for High-Efficiency Resilient.

4 · A FOR HER

5 · H MEETS N

6 · THREE BARS OF HER

THE LETTERS

Two names, five letters, one network

The company and its network share a story: a women-led enterprise building resilient infrastructure. Each concept finds that story in the letters.

CONCEPT	LETTER IDEA	LEADS WITH
4 · A for Her	The A of AN becomes a woman; the N matches her angle	Access Network
5 · H Meets N	N (Access Network) and H (HER) share two stems; diagonal and crossbar weave	Both, equally
6 · Three Bars of HER	The E of HER is three bars: High · Efficiency · Resilient	HER Net

Signal Blue #0A5FBF

Growth Green #059669

Dark Gray #2B2F36

White #FFFFFF

CONCEPT 4

A for Her — The A of Access Network is a woman; the N stands beside her.

PRIMARY LOCKUP

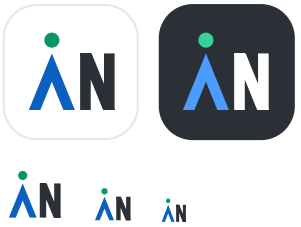

HER Net

HIGH-EFFICIENCY RESILIENT NETWORK

by Access Network

Construction on a 120-unit grid

App tiles; 32, 24 and 16 px

Cap height 64 units, stroke 12–13. A width 52, N width 39. Shared slope 26 / 64.

- **A as a woman:** a sharp, geometric A with a floating head. Women-led, written into the company initial.
- **N in rhythm:** same cap height and stroke; the N's diagonal runs exactly parallel to her leg, so /\ and |\| read as one AN.
- **Green head:** the person and the growth she leads.
- **Type:** Outfit SemiBold.

Strength

Puts Access Network's AN at the heart of the HER Net mark; warm and immediately human.

Watch out

Reads as "AN" more than "HER"; the head-over-A device is a familiar idea.

CONCEPT 5

H Meets N — One mark, two letters: the N of Access Network and the H of HER share their stems.

PRIMARY LOCKUP

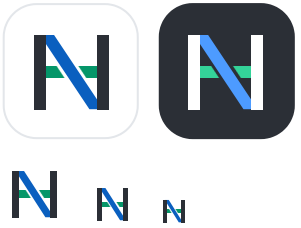

HER Net

HIGH-EFFICIENCY RESILIENT NETWORK

by Access Network

Construction on a 120-unit grid

App tiles; 32, 24 and 16 px

Square 84 × 84 units; stems 13; diagonal 16 wide; crossbar 13, centred; 3.5-unit knockout around the diagonal.

- **Shared stems:** two dark gray stems carry both letters.
- **N diagonal (blue):** Access Network's connectivity, passing over.
- **H crossbar (green):** HER and sustainable development, woven under the diagonal.
- **The weave:** two organizations integrated into one resilient network.
- **Type:** Manrope Bold.

Strength

Most ownable and corporate; one simple shape that holds at 16 px and on signage.

Watch out

Needs explanation once ("the N and the H in one"); after that it sticks.

CONCEPT 6

Three Bars of HER — The E of HER as three bars: High, Efficiency, Resilient.

PRIMARY LOCKUP

H≡R Net

HIGH-EFFICIENCY RESILIENT NETWORK

by Access Network

Construction on a 120-unit grid

App tiles; 32, 24 and 16 px

Arms 14 high on a 29-unit rhythm; lengths 41, 51, 63 from the spine; round ends radius 7.

- **H≡R wordmark:** the E is three free bars, so the word reads HER and the bars read as a signal meter.
- **One bar per word:** High · Efficiency · Resilient; the green base bar is the foundation.
- **Symbol:** the same E with a spine, its arms stepping out like rising signal.
- **Type:** custom H≡R lettering with Manrope Bold.

Strength

Turns the name itself into the idea; the wordmark is distinctive even without a symbol.

Watch out

The symbol alone is less ownable than the wordmark; lead with the word.

Works at 16 px	●●○	●●●	●●●
Corporate, minimalist	●●○	●●●	●●●

Scores are a designer's assessment for discussion (3 = strong).

RECOMMENDATION

H Meets N, with the H≡R wordmark

RECOMMENDED LOCKUP

REVERSED

Why the symbol

The only mark that holds both organizations in one shape: Access Network's N and HER's H, woven together. It is the most corporate, scales to 16 px, and is ownable.

Why the wordmark

H≡R makes the name explain itself: three bars, three words. Paired with the symbol it adds the "High-Efficiency Resilient" story without extra graphics.

Keep in reserve

A for Her for Access Network's own corporate mark, if the company wants a women-led AN monogram beside HER Net. Round 1's Her Signal stays the softer, community-facing option.

NEXT STEPS

From concept to final artwork

1. Choose a direction across rounds 1 and 2, or confirm the recommended pairing.
2. Refine: optical corrections to the weave, stroke contrast, and a 16 px version.
3. Test with staff, farmers and partners: does “H and N” or “H≡R” read without explanation?
4. Proof colors in print and choose Pantone matches.
5. Run a trademark search before adoption.
6. Deliver the final kit: SVG, PDF, PNG and EPS; favicon and app icons; a one-page usage guide.

Files included: for each concept, the symbol and horizontal lockup in color, reversed, one color and white, plus a construction drawing, as SVG with outlined type. The recommended pairing is in its own folder.
