Access Network
POWERED BY RA OMEGA

MESSAGING FRAMEWORK · VERSION 2.0

Access Network × HER Net

One story for a women-led ICT social enterprise and its community network: what we say, why it matters to Nueva Ecija's 2nd District, and the facts behind it.

6
LGUs served in the 2nd District

85.6%
of the district's people

Since 2011
serving Nueva Ecija

October 29, 2026 Replaces messaging in Brand & Style Guide 1.0, section 06 Draft for review

VERSION 2.0

What's new

CHANGE	WHAT IT MEANS	PAGE
HER Net integrated	HER Net (High-Efficiency Resilient Network) becomes Access Network's community network and smart agri program brand, with clear naming rules.	03
New logo	The HER Net logo with "Access Network Philippines" is added, with a green palette sampled from it.	04
Four message pillars	Women-led ICT social enterprise · Digital transformation champion · Community-centered connectivity · Building the local digital ecosystem (infrastructure, data, platform, user).	06–08
District 2 profile	Nueva Ecija 2nd District baseline with an agri focus: land, people, LGUs, GIDA areas, connectivity gaps, research hubs.	09–12
Proof points	Dashboard metrics updated per website notes: "Trained in ICT", "Farmers & MSME partners", "Resilient and sustainable infrastructure".	13
Audience messages & boilerplate	Rewritten for farmers, LGUs, research partners, development partners and business customers.	14–15

SOURCES USED

- Access Network Company Profile 2026
- Smart Agri & Food Security: Digital Connectivity Baseline (stakeholder briefing, 8 slides)
- Nueva Ecija vs. 2nd District: GIDA & Digital Connectivity Assessment (10 slides; PSA 2020/2024, DOH GIDA Registry, DICT R3, DENR)
- Website notes (GDA) and HER Net logo
- Review comments: AN and HER Net integration, logo, District 2 agri profile, message pillars

PENDING

An updated Nueva Ecija profile is coming as a reference. The district figures on pages 09–12 will be refreshed when it arrives. Open items are listed on page 16.

Access Network & HER Net

COMPANY · MASTER BRAND

Access Network
POWERED BY RA OMEGA

The women-led ICT social enterprise. Owns the relationships, contracts, services and track record since 2011.

↓ builds and runs ↓

NETWORK & PROGRAM BRAND

HER Net

High-Efficiency Resilient Network. The community-centered connectivity and smart agri network that Access Network is building across Nueva Ecija's 2nd District.

SITUATION	LEAD WITH
Company, contracts, invoices, business services	**Access Network** (legal entity names in contracts)
District connectivity program, smart agri, community hubs, live dashboard	**HER Net by Access Network**
Development partners, DICT, Congressional Office, LGUs	**Access Network** as the proponent; **HER Net** as the program
Training, women in ICT, ICT Forum	**Access Network**; HER Net when the activity is part of the network program
Social media and events	HER Net logo with "Access Network Philippines", as on the logo

Writing the names

- "HER Net": three capitals, a space, then "Net". Not "HERNet", "Hernet" or "Her Net".
- Spell it out once per document: HER Net (High-Efficiency Resilient Network).
- "HER" also signals the women-led team behind it. Say so in the story; keep the official expansion as above.
- Retire "Her Empowerment & Rural Network" from the Gemini prototype.

HER Net logo

What it says

A woman's profile whose hair becomes Wi-Fi arcs, with a young leaf: women-led connectivity that grows agriculture. The type stack names the network, its meaning and the company behind it.

Emerald	Forest	Mint	Gold	Slate
#059669	#094539	#34D399	#FCD34D	#0F172A
Buttons, accents	Hero, dark panels	Stats on dark	Highlight stat	Text

Using it with Access Network

- HER Net materials follow the website palette above: emerald accents on slate and white, with the forest-green gradient for heroes and covers.
- Access Network corporate pieces keep Signal Blue and Ink. AN Blue carries the "Access Network" line inside the HER Net logo.
- HER Net type: Outfit for headings in sentence case, Inter for text.

Palette and type follow the HER Net website (#pillars section), read from the screenshots in the website notes. Use the master vector logo file before print.

The story in three lengths

POSITIONING STATEMENT

For the farming communities, schools, LGUs and enterprises of Nueva Ecija's 2nd District, Access Network is the women-led ICT social enterprise that builds HER Net: community-centered connectivity, data and digital platforms that close the digital divide and power smart agriculture.

ONE LINE

Women-led connectivity for a smarter, more resilient harvest.

THIRTY SECONDS

Nueva Ecija's 2nd District holds a third of the province's land and some of the country's most important agricultural research, yet its upland villages still have under 5% fiber access. Access Network, a women-led ICT social enterprise serving the district since 2011, is building HER Net to change that: resilient community connectivity, field data and digital platforms, run with and for the farmers, students and local governments who use them.

TAGLINES

ACCESS NETWORK	**Connection that Matters** (unchanged)
HER NET	**High-Efficiency. Resilient. Ours.** Draft
PHILOSOPHY	Improving lives one connection at a time
DISTRICT CALL	Advancing smart agri together

Story order

1. The district matters: granary, research hub, food security.
2. The gap is real: upland GIDA barangays left behind.
3. We are local and women-led, here since 2011.
4. HER Net closes the gap layer by layer.
5. Join us: LGUs, agencies, partners, customers.

Four things we always say

A

Women-led ICT social enterprise

We are a women-led social enterprise. We measure success by network performance and social impact.

B

Digital transformation champion

We bridge the digital divide so rural communities lead, not follow, in the digital economy.

C

Community-centered connectivity

Connectivity designed with and for the barangay: farms, schools, health units and halls first.

D

Building the local digital ecosystem

Infrastructure, data, platform and users, built locally so the district's digital economy stays local.

HER NET PROGRAM AREAS (WEBSITE)	MESSAGE PILLAR IT PROVES
Women in ICT & Tech	A · Women-led ICT social enterprise
Smart Ag & Rural Broadband	C · Community-centered connectivity
Resilient and Sustainable Infrastructure	D · Infrastructure layer
Digital Safety & Literacy	B · Bridging the digital divide; D · User layer

Message pillars are **what we say**. Program areas are **what we do** and appear on the HER Net website as "Four Pillars of Inclusive Digital Transformation". Every program story should land on at least one message pillar.

A & B in detail

A · Women-led ICT social enterprise

"Technology is a catalyst for empathy and equity. Our women-led team builds networks with a double bottom line: technical performance and social impact."

PROOF	Women-led management; social enterprise model since the 2023 transformation; serving Nueva Ecija since 2011
PROOF	Fiber optic training and digital jobs training build local technical talent, including young women
PROOF	Fiber Optics & Tower Safety Bootcamp for Women Confirm date
METRIC	Number trained in ICT Value to supply
SAY	women-led, women in ICT, technicians from our own towns
AVOID	"100% women-led engineering teams" (removed per website notes)

B · Digital transformation champion

"Digitalization should not be a privilege of the city. We bridge the digital divide so that rural Nueva Ecija takes part in the digital economy on its own terms."

PROOF	From cable TV (2011) to full ICT company (2023–2028 roadmap: Innovate, Connect, Collaborate, Grow)
PROOF	DICT Region 3 Outstanding Partner, 2024 and 2025; three DOST SETUP technology upgrades
PROOF	Annual ICT Forum since 2024, on cybersecurity and smart agri
THE GAP	GIDA fiber access under 5% vs. 60–70% household passings in the urban core
SAY	bridging the digital divide, digital transformation, digital safety and literacy
AVOID	tech hype; promising speeds or coverage we can't show

C & D in detail

C · Community-centered connectivity

"We connect the places a community depends on first: farms, schools, health units, barangay halls and disaster offices."

- Public school connectivity in Llanera, Rizal and Carranglan
- Barangay telehealth nodes for rural health units
- Smart agri extension centers: digital farmer registration
- MDRRMO disaster command links during severe weather
- Barangay digital hubs: solar-powered public Wi-Fi in GIDA halls
- Ugnayan sa Kanayunan roadshows Confirm

Say: community-centered, barangay, last mile, resilient. **Avoid:** "far-flung", "the provinces".

D · Building the local digital ecosystem

"Connectivity is the start. HER Net builds the whole stack locally, so value, skills and data stay in the district."

LAYER	WHAT HER NET BUILDS	MESSAGE
4 · User	Farmers, cooperatives, MSMEs, students, health workers and LGU staff trained in ICT, digital safety and literacy	People who use, run and own it
3 · Platform	Direct market access for cooperatives, e-governance, telehealth, e-learning, disaster command, live dashboard	Services that create value locally
2 · Data	Soil, weather and pest sensors; climate early warning; digital farmer registration; links to PhilRice, PhilMech, PCC and CLSU research	Decisions based on real field data
1 · Infrastructure	Fiber backbone across six LGUs, last-mile fiber, solar-powered nodes, LEO satellite backhaul for GIDA passes, barangay digital hubs, colocation and DRC	Resilient and sustainable infrastructure

Read the table from the bottom up: each layer depends on the one below it. Use the four words in this order: infrastructure, data, platform, user.

Nueva Ecija's 2nd District

The northern half of the country's rice granary: a third of the province's land, its national agri research hub, its irrigation source at Pantabangan Dam, and most of its geographically isolated barangays.

8
LGUs: San Jose City, Science City of Muñoz and 6 municipalities

~492k
Residents; 20.5% of the province

1,897 km²
Land area; 33.3% of the province

~118.5k
Households; 4.1–4.2 members each

~60%
Of the province's GIDA barangays are in this district

Agri economy

Agri-tech and seed production in Muñoz; irrigated rice plains in Llanera; onion and vegetables in Rizal; rice and corn in Lupao; rainfed rice and livestock in Talugtug; corn, onion and vegetables in the uplands.

Water & energy

Pantabangan Dam supplies major power, irrigation through NIA-UPRIIS, and inland tilapia fisheries.

People

64.5% of residents are of working age (15–64); 28.6% are under 15. Upland LGUs have higher youth ratios. Gender split: 51.2% male, 48.8% female.

85.6% of the district's people live in the six LGUs Access Network serves: San Jose City, Science City of Muñoz, Rizal, Carranglan, Llanera and Pantabangan (421,885 of 493,038 residents, from the LGU table).

The eight LGUs

LGU	STATUS	BARANGAYS	POPULATION	LAND KM²	PEOPLE / KM²	AGRI & ECONOMIC PROFILE	AN FOOTPRINT
San Jose City	Component city	38	150,917	185.99	811	Commercial and transshipment hub; gateway to Cagayan Valley	● Served
Science City of Muñoz	Component city	37	84,308	163.05	517	National agri R&D hub (CLSU, PhilRice); seed multiplication	● Served
Rizal	Municipality	26	70,196	120.55	582	Lowland and foothill onion and vegetable farming	● Served
Lupao	Municipality	24	45,917	121.33	378	Northern border town; rice and corn	○ Not yet
Carranglan	Municipality	17	42,420	705.31	60	Upland pass; primary GIDA cluster; corn, onion, vegetables	● Served
Llanera	Municipality	22	42,281	114.44	369	Central irrigated rice plains	● Served
Pantabangan	Municipality	14	31,763	392.56	81	Hydro reservoir and watershed; inland fisheries	● Served
Talugtug	Municipality	28	25,236	93.95	269	Western rainfed rice and livestock	○ Not yet
District total		**206***	**493,038**	**1,897.18**	**260**	Province: 32 LGUs, 849 barangays, ~560,000 households, 5,689.69 km²	

Source: PSA / DENR, via the 2026 baseline briefing. *The LGU rows add up to 206 barangays; the briefing's summary states 221 (26.0% of the province). Confirm before publishing. "Served" reflects the six-LGU footprint in the smart agri briefing.

Two districts in one

LOWLAND · URBAN CORE

San Jose, Muñoz, Llanera, Lupao

LAND	~42% (~799 km²)
PEOPLE	~85% of the district
TERRAIN	Flat alluvial farm plains
DENSITY	370–810 people / km²
GIDA	Low: under 5% of barangays

UPLAND · GIDA CORRIDOR

Carranglan, Pantabangan, upland Rizal

LAND	~58% (~1,098 km²)
PEOPLE	~15% of the district
TERRAIN	Caraballo / Sierra Madre passes
DENSITY	60–80 people / km²
GIDA	41 classified barangays

MESSAGE

"Most of the district's land holds a small share of its people, and that is exactly where the network stops. HER Net is built for both halves."

Groupings as in the 2026 briefing. Its shares add up only when lowland Rizal and Talugtug count with the lowland core; upland figures match Carranglan and Pantabangan.

MOBILE 4G/5G

72–75%

Dead zones in mountain passes

FIXED WIRELESS

28–32%

Mostly San Jose & Muñoz

GIDA FIBER

<5%

Last-mile deficit

TECHNOLOGY	URBAN CORE	GIDA CORRIDOR	BOTTLENECK
Cellular data	**85–92%**	**20–35%**	Terrain blocks signal; towers are costly
Fixed fiber	**60–70% of households passed**	**<5%**	High cost per km; landslide risk on pass roads

Source: DICT R3 and baseline briefing estimates, 2026.

From gap to response

DISTRICT BOTTLENECK	HER NET RESPONSE	PILLAR
Market pricing asymmetry Upland farmers rely on traders; margins cut by 20–35%	Direct market access linking cooperatives to urban buyers and digital trading platforms; real-time price data	D · Platform
Climate and DRRM risk Delayed early warnings in Carranglan and Pantabangan landslide corridors	Climate early warning for typhoon, flood and drought; MDRRMO disaster command links; target of 100% GIDA emergency connectivity	C · D · Data
Education disparity GIDA students miss CLSU/PhilRice digital learning tools	Public school fiber in Llanera, Rizal and Carranglan; barangay digital hubs; digital safety and literacy	B · C
Last-mile deficit GIDA fiber under 5%, cellular 20–35%	LEO satellite backhaul with micro-solar in mountain-pass barangays; fiber extension through public-private partnerships with LGU right-of-way support	D · Infrastructure
Farm productivity Decisions made without field data	Precision smart agri: real-time soil, weather and pest monitoring; digital farmer registration at municipal agriculture offices	D · Data
Youth and skills Higher youth ratios in upland LGUs	ICT training, women in tech bootcamps, AgTech and IoT challenges	A · D · User

EPICENTER OF NATIONAL AGRI RESEARCH

- **PhilRice** (national HQ) and **PhilMech** (head office): rice research, seed, mechanization
- **Philippine Carabao Center**: livestock biotechnology, dairy
- **BFAR** National Center: freshwater aquaculture
- **DOST-PCAARRD**: R&D and climate-smart technology transfer
- **CLSU**: Central Luzon State University
- **NIA-UPRIIS** HQ: irrigation

MESSAGE

"The country's smart agri research already sits in our district. HER Net connects it to the farms that need it."

STAKEHOLDER ASK

Align LGU priority projects, DICT broadband expansion and private investment. Primary agency partners: DICT Region III and the Congressional Office.

Messages by audience

AUDIENCE	KEY MESSAGE	LEAD PROOF	CALL TO ACTION
Farmers & cooperatives	Know your soil, your weather and your price before you plant and before you sell.	Field sensors, early warnings, direct market access	Join a HER Net smart agri pilot
Barangays & communities	Your barangay hall, school and health unit, connected first, by people from your town.	Barangay digital hubs, school and telehealth links	Attend an Ugnayan sa Kanayunan roadshow
LGUs, DICT & Congressional Office	A local partner to reach 100% GIDA emergency connectivity and the district's smart agri goals.	District baseline; six-LGU footprint; DICT R3 Outstanding Partner	Align priority projects and broadband programs
Research & academe	Your research, in the field: HER Net links PhilRice, PhilMech, PCC, BFAR, CLSU and NEUST to farming communities.	Research hubs inside the district; ICT Forum	Co-design pilots and data sharing
Development partners (EU, Team Europe)	A women-led local implementer for inclusive, resilient digital infrastructure in a food-security district.	Ecosystem model (infrastructure, data, platform, user); district gap data	Partner on GIDA connectivity and skills
Business customers	One local partner for network, IT and power, built to enterprise standards.	Fiber in-house; colocation and DRC; solar	Request a site survey
Women & youth	Build the network your town runs on.	Fiber optic and digital jobs training; women's bootcamps	Apply for ICT training

Ready-to-use descriptions

SHORT · ABOUT 35 WORDS

Access Network is a women-led ICT social enterprise in Nueva Ecija, Philippines. Through HER Net, its High-Efficiency Resilient Network, it brings community-centered connectivity, data and digital platforms to the farming communities of the province's 2nd District.

LONG · ABOUT 110 WORDS

Access Network, powered by RA Omega Cable TV Corporation, is a women-led ICT social enterprise that has served Nueva Ecija since 2011. It is building HER Net (High-Efficiency Resilient Network) across six LGUs of the province's 2nd District: San Jose City, Science City of Muñoz, Rizal, Carranglan, Llanera and Pantabangan, home to 85% of the district's people and to national agri research centers such as PhilRice and PhilMech. HER Net builds the local digital ecosystem layer by layer, from resilient fiber, solar and satellite infrastructure to field data, digital platforms and ICT training, to bridge the digital divide in the country's rice granary. Access Network was named DICT Region 3 Outstanding Partner in 2024 and 2025.

Key terms

GIDA	Geographically Isolated and Disadvantaged Area (DOH classification). Spell out on first use.
SMART AGRI	Use "smart agriculture" in formal text; "smart agri" in headlines and UI.
BARANGAY	Keep the Filipino term; plural "barangays".
2ND DISTRICT	"Nueva Ecija's 2nd District" or "the 2nd Congressional District of Nueva Ecija".
LEO	Low-Earth orbit (satellite). Spell out on first use.
